

1850. CENTRIFUGAL SEPARATOR

Centrifugal separators are a most effective solution to remove up to 99% of the liquid condensate present in the compressed air network. CS separators type allow extremely reliable centrifuge operation and do not require any maintenance.

Designed to remove up to 99% of liquid condensate in the compressed air by very low maintenance costs. Installation downstream of aftercoolers, air receivers, refrigeration dryers etc...

TECHNICAL DATA :

Air connection size

Max. air flow, m3/min

Max. working pressure, bar
